

ZARGES

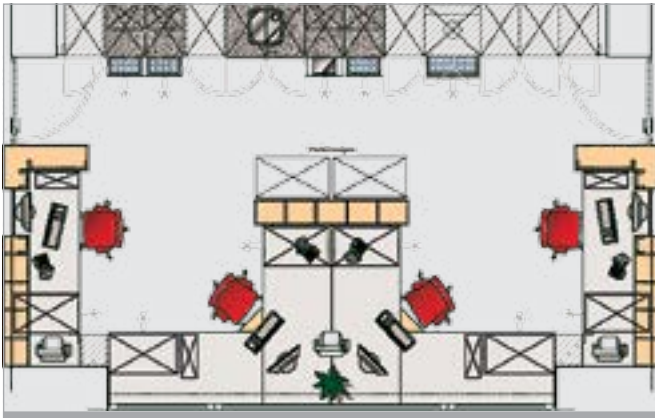

**ZARGES carts, shelving system and logistics
for healthcare—
coordinated solutions for your facilities.**

Fine planning for cupboard systems

Planning for central storerooms

Spatial planning

Implementation and service

Five steps to success:

Planning of operating and nursing areas – Planning, supervision of construction, processing and execution.

- **Costing**
Taking into consideration existing storage and transport media, we determine and calculate the actual requirements, both with regard to quantities and cost.
- **Spatial planning**
We calculate the exact storage capacity required on the basis of consumption analyses, and storage facilities are redesigned to meet the requirements with regard to hygiene and ergonomics.
We also optimize the interfaces between operations, logistics and office organization to ensure seamless transitions.
- **Drafting and design**
We plan the installations on the basis of logistical standards. Material and design are tailored to the specific requirements in your facility.
- **Schedule**
We supervise construction, coordinate and monitor technical processes and deadlines – if required, in cooperation with your technicians, planners and specialist engineers. Where there are special requirements (radiation protection, fire protection etc.), our specialists will find the ideal solution while still ensuring optimum logistics planning.
- **Service**
Thanks to our network of specialist dealers and partners, we are in a position to act quickly and reduce downtimes to a minimum.

ZARGES Inc.

1440 Center Park Drive, Charlotte, NC 28217

ZARGES MPO – robust and flexible modular organization carts

Priced from: **\$1230 - \$2447**

A coordinated family of products for individual requirements.

The requirements placed on carts for mobile use of equipment are manifold. ZARGES modular carts can be tailored precisely to your individual requirements so that you are optimally equipped for every application. Whether you need to operate medical equipment while doing the rounds on hospital wards or working in a laboratory – the modular design of ZARGES MPO allows a wide variety of options which you can configure to your specific needs. Their unlimited mobility and modularity enable these carts to be extremely flexible and ready for use in all applications.

1 Aluminum handle.
Aluminum handle provides comfortable handling. Easy to clean. A wide range of standard accessories may be easily attached.

2 Precision casters, optionally with deflector.
Four precision casters, two of them with wheel brakes for maximum mobility in confined spaces.

3 Worktop options.
HPL with / without raised edge. Plastic with / without gallery, optionally with adjustable rail. Stainless steel.

4 Side wall options.
Side wall, available with multiple options for colored center segment (C).

MPO IT cart

Keyboard drawer

Electronics compartment

With the MPO IT cart, ZARGES offers a solution for flexible work stations and mobile access to system data. The easy to move MPO IT cart can be equipped to accommodate various IT solutions including notebooks and computers (PC with screen or thin client).

- Body made from sturdy, anodized aluminum corner profiles, and aluminum side walls and rear wall, all with powder coated surfaces.
- Different front styles available.
- Drawers are mounted on telescopic rails, with soft closing and drawer stop.
- Space saving roller door with support wall.
- Worktop available in HPL or ABS plastic, with and without railing, and as an option with an adjustable rail rod.
- Keyboard drawer.
- Monitor bracket.
- Four plastic padded wall guards at the height of the cart floor.
- Four swivel casters, 4.9" diameter, two with brakes.
- Ergonomically shaped sliding handle made of anodized aluminum.
- Lockable compartment for power supply, thin client and/or router.
- Different heights and widths available.
- Standard color: light gray, RAL 7035. The side panels may be special ordered in custom colors.

Hook in insert rails

U section profile with hole pattern, without cavity, easy to clean

The shelving system for a wide variety of applications.

- Universal shelving system for storage and retrieval areas.
- Simple height adjustment with removable insert rails.
- Height adjustment, with holes spaced every 2.8".
- Allows for horizontal or angled arrangement of the ISO modular baskets.
- Hygienic, easy to clean.
- For use with ISO modular baskets 23.6" × 15.7" made from plastic.
- Made of powder coated steel.
- Color light gray, RAL 7035.
- Frame made from robust square tubing 1.2" × 1.2".
- Frame made from U section, dimensions 1.3" × 1.3" × 0.1".
- Lower edge has height adjustable feet for storage and retrieval shelving or with casters for storage and retrieval cart.
- Hook in insert rails are made from anodized aluminum with sturdy abrasion resistant end caps made of fiberglass reinforced plastic PA6, color anthracite.

Note:

Matching modular baskets in various heights available.

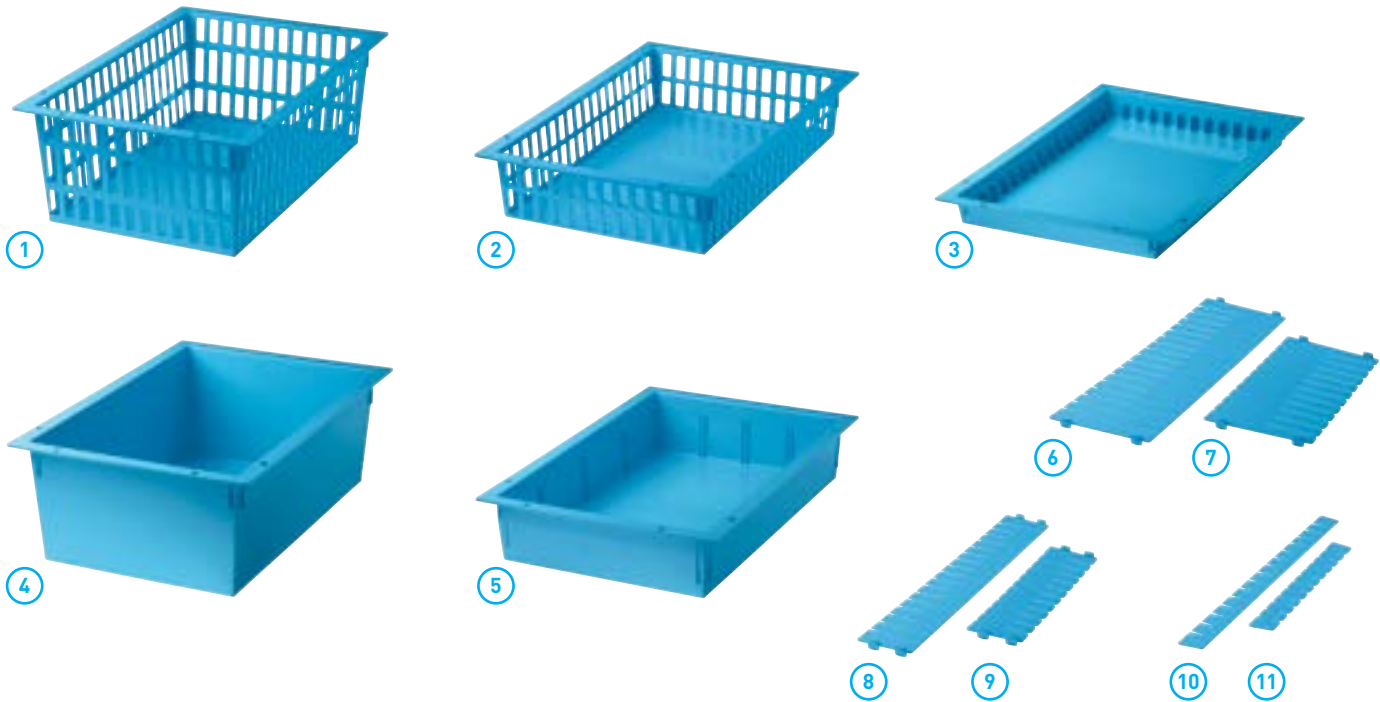

Shelving system in stainless steel version available on request.

Perfectly equipped for a hard day's work.

ZARGES W105 aluminum carts are indispensable helpers for transportation and storage.

Top quality is always a question of details.

This multi functional cart is for protected, safe and hygienic storage, and for organized transport of tools, laundry, food and many other items. The W105 is designed to serve the needs of hospitals, clinics, laboratories, universities, laundries, caterers and others.

The ZARGES W105 cupboard cart is the solution of choice for internal and external transport and storage requirements. Features include a stable body made of anodized aluminum, peripheral frame made of solid profile sections, ergonomic sliding handles, doors that open wide with integrated seal and central locking, smooth running on asymmetrically arranged casters with rubber tires, and a wide range of equipment and functional accessories.

1 Cart top: Equipped with a front fender as standard, fender can be added at the back if required, suitable for transport by truck.

2 The peripheral door seal between the body and the door leaves is suitable for cleaning in wash down facilities and provides protection against dust.

3 Sliding handle: made from ergonomically shaped aluminum profile.

4 Under body: made completely from aluminum, corrosion resistant.

5 Door lock: ergonomically shaped. Can be fitted with a lead seal, easy to operate lever with locks at the top and bottom ensures reliable closing, suitable for transport by truck.

6 Fender: with abrasion and plastic padding, easy to replace.

7 Wheels: Two swivel and two fixed casters, corner mounted, easy running, rubber wheels, "non marking," roller bearings, thread guards.

8 Smooth interior: Inside dimensions correspond to clearance dimension. Easy to clean.

W105 universal storage cart

Practical transport and storage cart, e.g. for clean and soiled laundry and many other items.

- Aluminum cupboard cart, anodized, for a wide variety of applications.
- Open body on one side with peripheral profile section frame.
- Corner connection via corner pieces made from cast aluminum.
- Smooth interior; no undercuts / no inaccessible areas in wash down facility (inside dimensions correspond to clearance dimension).
- Integrated peripheral door seal in the profile section frame, for high noise damping and protection against dust.
- Two doors, foldable 270° parallel to the end faces, open doors secured by magnetic catch.
- Doors are 0.1" thick, with continuous profile hinges.
- Central locking with easy to operate lever ensuring reliable closing at top and bottom.
- Doors will not spring open during transport by truck.
- Ergonomically shaped sliding handle of anodized aluminum section on the swivel caster side.
- All round fender frame with abrasion resistant plastic padding at the bottom; heat resistant to 203°F.
- One fender half on the top, on the door side, with abrasion resistant plastic padding; heat resistant to 203°F.
- Wheels: two swivel and two fixed casters, corner mounted, 7.9" diameter, 2" wide, easy running, rubber wheels, "non marking," roller bearings, thread guards.
- Also suitable for container wash down facilities when suitable special running gear casters are used.
- Easily sterilized and resistant to damage from cleaning agents.

W161 spring loaded cart

No more bending: loads are kept at a constant height for easy access, for example in libraries, laundries or in the catering trade.

- Sturdy, generously dimensioned edge and base profile sections, high strength positive locking ensures permanent bonding to jacket metal.
- Edge profile section reinforced with abrasion resistant plastic padding.
- Cart with vertically movable base which keeps the load at constant height for easy access (Fig. 1).
- Depending on the type of cart, the load capability can be varied from 66.1 to 429.9 lbs. in increments of 33.1 lbs. by means of replaceable lifting elements.
- The movable base does not tilt, even when loaded on only one side (Fig. 2).
- Wheels: two swivel and two fixed casters, 4.9" diameter, 1.6" wide, easy running, rubber wheels, "non marking," roller bearings, thread guards. Casters arranged centrally for easy maneuvering even in the most confined spaces.
- Corner mounted wheels available on request.

Storage and retrieval cart, project specific

Variation: spring loaded cart with step stool

The combination of a spring loaded cart with a step stool is particularly suitable for use in storage and retrieval areas in industry.

Project specific fabrication to meet your individual requirements.

ZARGES DATA® –

new, even more user friendly concept.

Priced from: **\$305 - \$1612**

Professional data disposal firms and companies large and small have relied on the safety of the ZARGES DATA® security container for many years – the new quality will astound you:

- Especially sturdy due to large edge and base profiles.
- Unique stability because profile section joints are continuously welded in the cross section.
- The profile sections have a fully integrated and permanently engineered bond which positive locks them to the jacket and base metal.
- End and side walls reinforced with peripheral beading and corner beads (2.5 ft.³ container with corner beads only).
- All riveted joints are made with high quality full rivets.
- Lid has solid surrounding lid frame with integrated wall fenders (piping buffer profile) and slotted lid plate.
- Lid with slot (approx. 16.5" × 0.9"), with locking plate and spring loaded flap.
- Logo holder for your unique labeling.
- Container available with various locking system options.
- Optimum mobility with a wide choice of wheel options.

Select the ZARGES DATA® security container suitable for your application. With seven different basic models and a wide range of accessories, you can choose from well over a hundred possibilities.

Where order quantities permit, we can also produce custom solutions.

Spring loaded flap with or without locking bar

Lids are equipped as standard with a deposit slot and spring loaded flap.

Locking bars for securing the flap are available as an option.

Lid can be opened wide for easy unloading

Lockable deposit slot as an option

Individual labeling of your ZARGES Data® security container

The redesigned logo holder on the lid allows you to label your container individually. Label your ZARGES DATA® security container with your company logo, the name of your department or other information. Print out your label, cut it to size and insert it.

We recommend you order an empty sheet of waterproof labels for your printer at the same time. And of course, we can also supply your ZARGES DATA® security container security container pre-labeled with your company logo. The sturdy Plexiglas sheet protects your label from scratches. Logo holders are delivered with the ZARGES DATA® logo as standard.

If you use the latch lock, logo holder 2 can be attached in the recess as an option.

Replaceable logo holder

Logo holder positioned in the recess

Lock variants for more data security

Snap fastener

secured with lead seals or a padlock.

Snap fastener with plug lock

and secured with lead seals or a padlock.

The practical combination lock.

Enter your personal code – security even without keys.

Latch lock in the recess for maximum security. Individual locking system with authorized card. Lock body made from strong cast aluminum.

All round protective lid piping in various colors

Select from five standard piping colors.

For large order quantities, you can specify your own color – please ask for more information.
